PROFESSIONAL SUMMARY

B.Tech Artificial Intelligence student with hands-on experience in Python, MySQL, HTML, CSS, Flask, Git and GitHub. Built an AI-based Civic Issue Mapper for structured citizen complaint reporting, issue tracking, map visualization and administrative analytics. Strong foundation in DBMS, Operating Systems, OOP, problem solving and software testing, with a growing focus on AI/ML and software development.

TECHNICAL SKILLS

Programming: Python, Java, SQL

Web Technologies: HTML5, CSS3, Bootstrap, Flask

Database: MySQL, SQL, Database Management Systems

AI/ML: Artificial Intelligence fundamentals, AI/ML fundamentals, Data Analytics fundamentals

Core CS: DBMS, Operating Systems, OOP, Data Structures & Algorithms fundamentals

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook

Testing & Development: Software Testing, Debugging, API Integration, Authentication, Problem Solving

Other: MS Excel, Responsive Web Design, Technical Documentation

PROJECTS

AI Civic Issue Mapper | Python, Flask, MySQL, Bootstrap, Leaflet, Git/GitHub

- Developed a civic issue reporting platform for reporting potholes, garbage, broken streetlights and other local issues with description, image and GPS location.
- Implemented user authentication, complaint submission, My Issues, admin dashboard, complaint search, status updates and department assignment.
- Added map-based complaint visualization using Leaflet/OpenStreetMap and analytics for monitoring issue trends and high-risk open complaints.
- Worked on API integration, testing, duplicate-issue detection concepts, SLA tracking, auto-routing and government/municipal workflow integration planning.
- Designed the solution around smart governance, citizen participation and transparent grievance tracking; the project is still under active development.

FoodBridge | HTML5, CSS3, Flexbox, CSS Grid, Git/GitHub

- Developing a responsive food-donation web platform with dedicated donation, volunteer, about and contact pages.
- Designed a clean, user-friendly interface with responsive layouts, reusable styling and easy navigation.
- Maintained the project on GitHub and continue improving features, UI and functionality.

EDUCATION

B.Tech — Artificial Intelligence | Mangalmay Group of Institutions, Greater Noida, Uttar Pradesh | 3rd Year

CERTIFICATIONS

- Introduction to Generative AI — Google (20 June 2026), Certificate Code: 10372714
- Gemini for Google Workspace — Google (21 June 2026), Certificate Code: 10374756
- Introduction to Prompt Engineering with GitHub Copilot — Microsoft (21 June 2026), Certificate Code: 10374864
- Python (Basic) — HackerRank, Certificate: 768439348300

ACHIEVEMENTS & ACTIVITIES

- Participated in Smart India Hackathon (SIH) with the AI Civic Issue Mapper project.
- Research paper work on AI Civic Issue Mapper / AI-enabled civic grievance management.
- Hands-on Git and GitHub workflow experience including repositories, commits and project documentation.
